SMARTIA S560

LIFT & SLIDING INSULATED SYSTEM

S560 is a robust lift & sliding system that provides high level of thermal insulation, flexibility in construction and is ideal for large openings.

S560 offers flexibility given that it helps building windows & doors for small or very large spans. It offers quality constructions because of the profiles' stiffness and enables both internal and external "framing" for a stronger connection of the profiles, giving simultaneously economic construction, in matters value for price.

Furthermore, the series has evolved for hotel construction needs, with emphasis on typology sliding with constant leaf, which is supported at version two leaf meeting point, or fixed in the middle and left right uplifted leaf. Due to the diversity and variety of the system profiles, all possible typologies (15) supported for uplifting sliding for 90, 200, 300 Kg with exceptional robust angular typology available.

In addition to all, it offers the possibility of placing anti insect mosquito net, built-in driver or without, with the possibility to hang it, from the top, to an already existing driver, for more freedom of movement.

In order to follow up the given abilities of this system we do have the following basic characteristics:

- Sash depth: 56 mm
- Smooth and easy sliding thanks to inox rails

- Lift & sliding mechanism for sashes from 90, 200 & 300 Kg
- Optional multi-locking mechanism can be installed
- Optional and minimal interlocking point in three versions: 49, 96 & 106.5 mm
- High level of thermal insulation: U_f from 2,2 to 5,9 W/m²K
- Covers all typologies of sliding systems

TECHNICAL CHARACTERISTICS

| | |
|------------------------------|--|
| Visible aluminium face width | 122,5 mm |
| Frame height | 45 mm |
| Frame width | 128 mm |
| Sash height | 86 mm |
| Sash width | 56 mm |
| Sash weight | from 90, 200, 300 Kg |
| Glazing | from 22 έως 44 mm |
| Insulation | 24 mm polyamide into the frame & 16-24 mm into the sash |

TYOLOGIES

Horizontal lifting sliding

Double lifting sliding sash

Four lifting sliding sashes meeting stile

Triple lifting sliding sash

Six lifting sliding sashes with meeting stile

Corner typology

Lifting sliding with fixed lights

Single lifting sliding sash with fixed light

Two lifting sliding sashes with fixed light

Single lifting sliding sash with two fixed lights

Double lifting sliding sash with meeting stile & with two fixed lights

Lifting sliding into wall cavity

Single lifting sliding pocket sash with fly-screen & shutter

Single sash sliding window with fly-screen

Single sash sliding window with shutter

Double lifting sliding pocket sash with meeting stile, with fly-screen & shutter

CERTIFICATES

Air permeability EN 1026, EN12207

CLASS 3

Watertightness EN 1027, EN 12208

CLASS E750

Resistance to wind load EN 12210, EN 12211

CLASS C4/B4

Thermal Insulation EN 10077-2

U_f from 2,2 to 5,9 W/m²K
